

Requisition Number:

Job Description.

HORIBA MIRA is looking for a Functional Safety Consultant to join a unique and growing team. Based at the heart of the UK automotive industry, they will form part of the growth strategy within HORIBA MIRA. This role will include, but not be limited to, delivering and developing MIRA's trusted functional safety service, including:

- Delivery of functional safety engineering services through the whole-vehicle's development lifecycle
- Research and development of new functional safety services and products
- Supporting the wider multi-disciplinary team of Cybersecurity, Electromagnetic Resilience and Functional Safety experts in developing and delivering integrated Vehicle Resilience services.

This technical role requires a highly motivated individual with experience in risk-driven engineering methods, safety analysis and creative but structured problem resolution.

We are offering the chance to work in a world-class, independent engineering consultancy, operating in multiple locations around the world, to support vehicle manufacturers and their supply chain with cutting-edge engineering and testing expertise. We offer full-system design, test and integration expertise to automotive, defence, rail and transport industries and also specialise in developing low carbon and autonomous and co-operative driving technologies.

At our headquarters in the Midlands, we have access to one of the most comprehensive vehicle proving grounds which boasts 93km of test tracks and over 35 world-class test facilities and laboratories. Our facilities, combined with the engineering expertise of our 600 strong team makes MIRA Technology Park Europe's number one location for transport sector R&D.

Title of Job:	Functional Safety Consultant		
Department:	0441 Systems & Safety		
Grade:	Consultant (5P)		
Date Required:	ASAP		
Salary Range:	£42k-£62k + bens depending on skills and experience		
Number Required:	1		
Location:	Nuneaton, UK / Work from Home		
Wor	Permanent:	Y	Contractor: N
Responsible To:	Team leader / Manager (systems and safety function)		
Subordinates:	Typically 2-4 depending on assigned projects		

Main Purpose of Job
<ul style="list-style-type: none"> • Take a principal role in executing functional safety activities for internal or external customers • Provide expert level consultancy in ISO 26262 and safety analyses including FMEA

Key Functions
<ul style="list-style-type: none"> • Coordinating safety analyses and engineering activities within a small team

- Coaching the team to deliver consistent and successful results
- Technical project management / decision making to deliver on time, to cost and quality
- Managing challenging stakeholders who can have diverse objectives
- Taking a lead sometimes autonomous role in auditing safety related development processes
- Training/coaching other less experienced members of staff, particularly in audit and safety analyses
- Developing process to support functional safety
- Developing and delivering training on functional safety
- Delivering value-add functional safety consultancy/guidance
- Supporting the product groups in tendering activities

Essential Qualifications	Preferred Qualifications
<ul style="list-style-type: none"> • Good first degree (minimum 2:1) in electrical/electronic engineering, systems engineering or a relevant related discipline 	<ul style="list-style-type: none"> • Higher degree (relevant M.Sc, Eng D or Ph.D) • Corporate membership of an engineering institution including Chartered Engineer qualification

Essential Experience	Preferred Experience
<p>Expert (5+ years' experience in):</p> <ul style="list-style-type: none"> • Delivering ISO 26262 to vehicle manufacturers and tier 1 suppliers covering all aspects of the safety lifecycle • Safety analyses techniques, particularly FMEA with broad exposure to different processes, methodologies and stakeholder objectives <p>Experience in all of:</p> <ul style="list-style-type: none"> • Functional safety planning & management • Identifying hazards, performing risk assessment and classification • User and systems level requirements capture, management and technical review • Preparing safety cases (including safety arguments) • System level architectural design and technical review • Technical leadership of small project teams • Tendering process and preparation of project proposals • Developing and delivering training courses 	<p>Some combination of:</p> <ul style="list-style-type: none"> • Controllability of vehicles, in particular vehicle dynamics, control system performance and human-machine interactions • Embedded hardware design and technical review for safety-related systems and ADAS • Embedded software design and technical review for safety-related systems • Defence safety-related systems standards such as Def Stan 00-56 and DO-254 • Off-highway or earth-moving safety-related standards e.g. ISO 15998, BS EN 474 • Machinery safety-related standards e.g. ISO 13849 • Other automotive-relevant safety-related systems standards such as IEC 61508 or MISRA SA • Engineering process development and practical implementation; including CMMI, ISO 15504 (SPICE) • Awareness of cyber-security principles and their commercial application (e.g. threat analysis, security requirements/techniques and penetration testing) • Involvement in ISO, SAE, MISRA or other relevant standards/guidance development bodies • Executing and reporting on independent safety assessment (confirmation measures)

The candidate must have a strong experience in systems engineering and requirements driven developments and be capable of advising clients on best-practice.	
--	--

What is the candidate likely to be doing now?
• Functional safety specialist or consultant for an automotive VM, Tier 1 or Tier 2 supplier

Other information
<p>The candidate should:</p> <ul style="list-style-type: none">• Be capable of delivering a high standard of technical writing• Be capable of presenting technical information confidently to customers• Be a self-starter and able to execute designated tasks accurately and within timing and budget constraints• Have well-developed analytical skills – rigorous but pragmatic, being able to justify decisions with solid rationale• Have good interpersonal skills – a consensus-builder not confrontational• Be capable of technically managing a small group of engineers• Be willing to travel and work flexibly: The job is likely to involve periods of 1 week at a time spent overseas approximately 6 to 8 times per year. The job may also involve extended placements at customer facilities requiring travel within the UK or Europe for 1 to 4 days per week for a significant period.
